PREFACE

This Mission Coverage Index (MCI) furnishes a listing of intelligence targets covered by Mission G 3055. The listing provides the latest description based on photographic interpretation for each target covered by the mission. Items in the listing are arranged by (1) country, (2) WAC area within the country, and (3) coordinates reading from south to north and from west to east. An explanation of column headings and photo reference data used in presenting the information is contained in the appendix.

For convenience of the user, a subject index to the intelligence targets has been included following the listing. Targets in the subject index are listed (1) by category, (2) alphabetically by country within the category, and (3) alphabetically by place name within the country.

Mission G 3055, accomplished on 16 August 1961, covered portions of North Vietnam, China, and Hainan Island (see accompanying Flight-Line Trace). Major areas covered include Dong Hoi, Vinh, Thanh Hoa, Lang Son, Lao Kay, Hanoi, and Haiphong in North Vietnam, and Yu-lin and San-Ya on Hainan.

APPENDIX
EXPLANATION OF COLUMN HEADINGS
AND PHOTO REFERENCES

Column headings used in the listing are as follows (reading from left to right):

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. The city and installation names are followed by a capsule description, where appropriate.

Coordinates -- Coordinates are given to the nearest minute. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers -- The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is an NPIC target numbered 0153-1 and an NPIC target numbered 0154-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

A photo reference is provided for every item in the target listing. The photo reference indicates frame(s) on which the target appears, and limiting conditions which affect interpretation of the target.
